We Just Finished This Installation: Cost \$0

This project is installed in a 180-unit Co-op property in Flushing. The total cost of the project was \$95,000 for 9 chargers and all related electrical work. The customer paid \$0.

They own and get to keep all the revenue the chargers generate.

They can set the price of charging for their residents and set a slightly higher price for visitors and the general public.

* We handle the project from start to finish: Incentive application, Electrical Permits, Wiring, Installation, NYC Building Department Inspection, Ongoing reporting.

All our chargers are commercial quality, connected and managed over the Internet.

Easy, Unattended operation. Users Tap their credit cards, or scan the QR Code to download the payment app.

- 5 Year Warranty on all equipment. No hassle operation. Simply contact us if any repairs are needed
- Offer discounted charging to your best customers
- Impose idle fees to cars that have finished charging, but remain parked in a charging spot
- Attract a diversified customer base to your business
